STATE OF MARYLAND,

OFFICE OF THE STATE BOARD OF EDUCATION,

BALTIMORE, January 15, 1885.

To his Excellency, ROBERT M. MCLANE,
Governor of the State of Maryland.

SIR: I have the honor to transmit to you the Annual Report of the State Board of Education for the school year ending July 31, 1884, and the fiscal year ending September 30, 1884, with accompanying documents, as required by law.

Very respectfully,
Your obedient servant,
M. A. NEWELL,
Secretary.

175788

REPORT

OF THE

STATE BOARD OF EDUCATION.

The following summary, in connection with the accompanying tables, exhibits in a condensed form the most important facts connected with the administration of the public school system of the state, including the city of Baltimore, for the school year ending July 31st, and the fiscal year ending September 30th, 1884, so far as such facts can be presented in figures. The several items are compared with the corresponding items for 1883:

Number of schools in Baltimore city.....	120	
" " " " the counties.....	1,977	
Total.....		2,097
Being an increase in 1884 of.....36		
Number of different pupils, city.....	54,778	
" " " " counties.....	115,615	
Total.....		170,393
Being an increase in 1884 of.....8,634		
Highest number enrolled in one term, city.....	38,618	
" " " " " counties.	98,156	
Total.....		136,774
Being an increase in 1884 of.....3,974		
Average number in daily attendance, city.....	33,009	
" " " " counties.	53,477	
Total.....		86,486
Being an increase in 1884 of 1,166		
Number of teachers, city.....	893	
" " " counties.....	2,460	
Total.....		3,353
Being an increase in 1884 of.....64		
Number of months schools were open, city....	10	
" " " " " " counties.	8.7	
Average for the state.....		9.1

Receipts from all sources, city	$ 650,128 98	
" " " counties	1,018,911 71	
Total		$1,669,040 69
Being an increase in 1884 of..$91,221.68		
Amount paid for teachers' salaries, city	$ 550,029 98	
" " " " " counties	695,654 46	
Total		$1,245,684 44
Being an increase in 1884 of..$49,700.13		
Amount paid for building, repairing and furnishing school-houses, city	$ 56,278 76	
Amount paid for building, repairing and furnishing school-houses, counties	82,376 48	
Total		$ 138,655 24
Being an increase in 1884 of..$14,967.87		
Amount paid for books and stationery, city	$ 39,844 27	
" " " " " " counties	46,761 09	
Total		$ 86,605 36
Being an increase in 1884 of...$2,705.41		
Amount paid for rent, fuel and incidentals, city	$ 55,199 52	
Amount paid for rent, fuel and incidentals, counties	54,424 10	
Total		$ 109,623 62
Being a decrease in 1884 of.....$73.66		
Total expenses for Public School purposes, city	$ 701,352 53	
Total expenses for Public School purposes, counties	1,018,911 71	
Total		$1,720,264 24
Being an increase in 1884 of $117,052.99		

Excluding the city of Baltimore, the county schools show the following results:—

Number of schools	1,977	
Increase		37
Total number of scholars enrolled	115,516	
Increase		2,732

Highest number enrolled in one term	98,156	
Increase		2,922
Average number enrolled	85,616	
Increase		1,825
Average number in daily attendance	53,477	
Decrease		242
Number of teachers (including assistants), men	1,105	
Number of teachers (including assistants), women	1,355	
Total	2,460	
Increase		26
Average number of months schools were open.	8.7	
Amount received from State School Tax, Free School Fund and Academic Donations	$ 336,213 43	
Increase		$ 34,153 72
Amount received from appropriation to colored schools	$ 78,531 52	
Increase		$ 16 15
Amount received from county tax	$ 425,874 62	
Increase		$ 5,446 28
Amount paid for teachers' salaries	$ 695,654 46	
Increase		$ 24,705 20
Amount paid for building, repairing and furnishing school-houses	$ 82,376 48	
Decrease		$ 774 25
Amount paid for books and stationery	$ 46,761 09	
Increase		$ 4,596 98
Amount paid for supervision and office expenses	$ 41,359 11	
Increase		$ 1,761 08
Amount paid for incidental expenses, including fuel and rent	$ 54,424 10	
Increase		$ 3,914 20
Amount paid for interest	$ 3,518 44	
Decrease		$ 842 95
Amount paid for miscellaneous expenses*	$ 23,437 15	
Increase		$ 16,085 02
Amount of indebtedness paid	$ 37,756 51	
Increase		$ 602 71
Total expenditure for Public School purposes in the counties		$ 985,287 34

*This includes an expenditure of $15,855.09 in Garrett county, raised by the sale of County Bonds, and used in payment of old indebtedness, of which the details have not been reported.

The items of expenditure which show an increase are:

Teachers' salaries	$ 24,705 20	
Books and stationery	4,596 98	
Supervision and office expenses	1,761 08	
Incidentals, fuel and rent	3,914 20	
Miscellaneous	16,085 02	
Indebtedness paid	602 71	
		$ 51,665 19

The items which show a decrease are:

Building, repairs and furniture	$ 774 25	
Interest	842 95	
		$ 1,617 20
Showing a net increase of expenditure in 1884 of		$ 50,047 99

The showing for the year is very satisfactory, except in one particular. The increase in the number of schools and pupils corresponds with the natural increase of population, and the increase of expenditure corresponds with the increase in the number of pupils. But the average daily attendance has not increased. This is partly to be accounted for by an exceptionally severe winter, which made the country roads impassable for many weeks, and by the prevalence of scarlet fever and diphtheria in some sections. Making due allowance for these hindrances, there still remains a considerable residuum of preventible absenteeism, against which the most vigorous efforts of teachers and school officers should be directed. It is in their power to reclaim many of those whose names are on the roll, but who are so seldom in the school-room as to derive no practical benefit from the liberality of the state which has provided them with the means of instruction

FREE BOOKS.

In a former report the opinion was expressed that free schools logically implied free books. There is no reason why, in a system of free public schools, parents should be called on to pay for anything that properly belongs to the equipment of the school-house—desks, stoves, pens, ink, or books. During

the past year the city of Baltimore has taken the inevitable step and resolved that henceforth the odious distinction between "pay pupils" and "free pupils" shall be abolished. Among the many advantages which will follow from this change in the right direction may be reckoned an increase in the number of school-going children, and if the counties could see their way through the pecuniary difficulties which alone prevent their following the example of the city, not only would the number of pupils be increased, but the efficiency of the schools would be greatly promoted. None but practical teachers know the difficulty of working without the proper tools. Classes are sometimes disorganized for weeks, and sometimes are not organized at all, owing to the delay or the refusal to procure the necessary text-books. It is reckoned that an addition of three-fourths of a cent in the hundred dollars to the state tax and the same addition to the county tax would be sufficient to pay for this most desirable improvement.

THE SCHOOL LAW.

No changes have been made in the school law since 1874; not that no improvements could be suggested, but because a feeling of stability and permanence was worth more than any trifling change, and no radical changes seemed desirable. If, however, the school law should come before the Legislature for revision, the State Board would offer the following suggestions as embodying part of their experience:

1st. Necessary text-books for use in the school-room should be supplied without charge.

2nd. The state school tax should be twelve cents on the hundred dollars, and the minimum county tax should be no less.

3rd. The state tax should be distributed to the several counties in proportion to the average enrolment of the pupils, white and colored, no pupil to be counted who has not made an attendance of at least sixty days (or 120 half days) in the year.

4th. The few remaining county academies should be made a part of the public school system.

5th. There should be but one school district trustee, in place of three under the present law.

6th. Every principal of a public school should be required to make report at least twice a month by postal card to the examiner, of the condition of his school as regards attendance, etc.

7th. Legal provision should be made for ascertaining accurately once in every two years, in the city of Baltimore and the several counties, the number of children of school-going age (say over six years and under sixteen), the number attending public schools, and the number attending private and denominational schools.

HIGH SCHOOLS.

A revised edition of the by-laws of the State Board was published at the beginning of the school year. The principal change is the addition of three sections in reference to High Schools. The school law having omitted to give any definition of "High School," it became necessary to state explicitly what is necessary to constitute one. The former by-laws divided the schedule of primary instruction into six grades. The new by-laws provide that—

"The High School course shall begin with the completion of the sixth grade, and may include all the studies required for admission into the Freshman class at college. No school shall be classed as a High School unless it contains at least three grades higher than the sixth."

STATE TABLES.

Table "A" shows the population of Maryland by counties and the number of white and colored.

Table "B" shows the population between 5 and 20 and the quarterly distribution of the state school tax to the white schools of the several counties and the city of Baltimore.

Table "C" shows the assessed value of the property subject to taxation in the several counties, with the amounts as "state school tax," "free school fund," "academic fund," "appropriation to colored schools" and "county school tax."

Table "D" shows receipts from all sources, with the totals, (including balances carried over).

Table "E" shows the expenditures of the several counties under the items of teachers' salaries, incidental expenses, books and stationery, building, repairs and furniture, supervision and office expenses, miscellaneous, interest, indebtedness paid, with the balance on hand and the totals.

Table "F" shows the number of pupils in the primary grades and the number studying special branches.

Table "G" shows the number of schools in each county; the number of months schools were open; the number of teachers, male and female; the number of different pupils; the average number of pupils enrolled and in attendance, and the highest number enrolled in one term.

Table "H" shows the statistics (under the same heads as those mentioned in table "G") of the colored schools separately.

Table "I" shows the expenditures for colored schools under the heads mentioned in table "E."

Table "K" gives the statistics of the several colleges receiving state donations, and of the State Normal School.

Table "L" gives the statistics of the several schools and academies receiving state donations.

SECRETARY'S REPORT.

Report of the Secretary of the Board.

It is not difficult to estimate quantitatively the amount of instruction given in the state during the past year by the agency of the public school system. The usual tables of statistics tell us with reasonable accuracy how many schools were open; how many terms they continued in operation; how many names were inscribed on the rolls, and the number of pupils in actual daily attendance. In plain figures there were 170,393 different pupils enrolled on the school register, each of whom attended school, on the average, ninety-two days. If the attendance of one pupil for one day be taken as the unit, the quantity of instruction given will be represented by 15,676,156. The statement of quantity is easy, precise, and sufficiently accurate. But how shall the *quality* be estimated? Where are the instruments for this kind of analysis? What weights and measures shall we use? What tests and re-agents shall we employ?

The statistical tables carry us but one step in this inquiry and then leave us. They tell us the number of pupils in each grade and the studies belonging to the several grades; they can tell us nothing more. A more minute system of book-keeping might let us know how many pupils were promoted from a lower to a higher grade during the year; but even this additional information would be only quantitative. The means for a qualitative analysis must be sought elsewhere than in tabular statements. The difficulty of the problem is increased by the great variety of objects presented for analysis. It is as if a sample of soil from every county in Maryland were sent to a chemist for the purpose of obtaining an analysis of the average soil of the state. What is true of one county is not true of another, and what is true of the

average is not strictly true of any one county. Nay, more; what is true of one part of a county is not true of another part. The same holds good of the schools. The schools of one county may be better than those of another; yet in every county there are some good schools; some not good enough, but showing signs of improvement, and some good for nothing, but to give a poor support to a poor teacher.

The great educational want—not of this state alone, but of the whole country—is the lack of trained teachers. For a long time it was assumed that anyone who knows what the school law requires him to know is a competent teacher. This fallacy having been given up, another, equally deceptive, has taken its place—that *experience* will supply the lack of training. If it did, the oldest teachers would be the best, which is contrary to fact. No amount of experience in doing a thing wrong will enable a man to do it right. Your "experienced teacher" is sometimes the slave of bad habits, which he is neither able nor willing to give up.

The work of educating the great body of teachers is necessarily slow; and with the means now at command it cannot be accomplished effectually. An untrained teacher is not worth half as much as a trained teacher; and yet they both receive the same salary even in counties in which the grade of the certificate is an element in fixing the salaries. Thus there is but little to induce those who are aspiring to be teachers to spend time and money in professional preparation. If they made teaching their life-work, time would bring a remedy. "Natural selection" would drive out the inferior and retain the better class; but, owing principally to the low salaries received, natural selection acts in the opposite direction. It drives out men who have energy and ambition, and keeps in those who cannot better themselves. While the lawyer and the physician, like the carpenter and the blacksmith, seek to raise themselves *in* their respective professions and trades, the teacher seeks to raise himself *out* of his profession. It is a waste of words to state a well-known evil without suggesting a remedy. The natural remedy is such an increase of salaries as will be sufficient to make teaching de-

sirable as a permanent employment. But such an increase of expenditure is—for the present, at least—out of the question; and, even if it could be obtained, it would work very slowly. The great educational problem is to supply this want of trained teachers, in sufficient numbers, quickly and cheaply.

An experience of sixteen years as superintendent of schools in this state, with exceptional facilities for observation in other states, has led me to the conclusion that the agencies now in use—normal schools, state and county institutes and associations, pedagogic works, and educational journals—have proved entirely inadequate to the solution of the problem. They are all good, so far as they go; but they do not go far enough, nor fast enough.

Our reliance, I think, must be on the county superintendency—not as it exists at present throughout the country, but as it might be amended and extended.

The county superintendency in Maryland is, theoretically and practically, on a better footing than in many other states. Theoretically, the county superintendent, or examiner, as we call him, is a trained teacher, who gives his whole time to the duties of his office. Practically, his office is held almost for life. During the last sixteen years the number of possible removals was one hundred and eighty-four. The number of actual removals was fourteen.

It was estimated many years ago that the average professional life of a public school teacher in the United States was but three years. It is probable that it does not exceed five years at the present time. It is not possible to make teaching one of the life-professions within this generation. But it is possible to make the superintendency a life-business, and by that means to secure the necessary continuity of the teacher's work. The school is what the teacher makes it. This has long been admitted. But that the teacher is what the superintedent makes him, or permits him to be, has not been generally acknowledged. Nevertheless experience proves that the right kind of superintendent has under him a majority of teachers of the right kind, and the wrong kind of super-

intendent is likely to have in his train many teachers of the wrong kind. What is the right kind of superintendent?

1. He must give his whole time, during business hours, at least, to the supervision of the schools while they are in session; and he must receive a salary in proportion to his services.

2. That his supervision may be profitable he must, himself, be a good teacher. If not a practical teacher (which, though desirable, is not absolutely essential), he must, at least, be well-read in the theory of the profession. It is not so important that he should be able to do school-work himself as that he should know when it is well done by others. Pestalozzi was but a poor practical teacher, but the Pestalozzian ideas are overspreading the world.

3. He should be independent of local authorities and disconnected from local politics. A superintendent nominated and elected by party machinery, and liable to lose his place at the end of one or two years, works under serious disadvantages. If he proposes to remain but one term in office he knows that he can accomplish but little in that limited time, and he is not apt to occupy himself with laying a foundation that another may build thereon; while if he proposes to be re-elected his attention is distracted between the care of the schools and the anxieties of the next campaign.

4. This implies that the superintendent's office should be made as secure from unnecessary change as the presidency of a college. No capable man will accept the latter position with the understanding that he will probably be dismissed at the end of two years. There may be reasons for making a change in either office; but the reasons should be such as will bear investigation, and there should be power to make the change not merely at the end of a specified term, but at any time for due cause.

5. The superintendent, being a trained teacher himself, theoretical or practical, should devote a large part of his time to the training of other teachers. He should not simply observe and suggest and report; he should take the reins in hand when necessary and drive. That which has been inculcated at the Teachers' Institute he should put into practical

operation. He should know every school under his jurisdiction and almost every scholar, as a merchant knows every customer on his books, or as an experienced engine driver knows every rail upon the road.

6. This implies, further, that the number of schools to be supervised by one person is limited. This limit will depend on the nature of the schools, and of the territory. A city system is more easily supervised than the schools of a county. The schools in a sparsely settled territory will need a greater number of superintendents than the same number of schools in a densely populated community. Again, the number will depend largely on the professional character of the schools; the best schools needing the smallest amount of active supervision, though they need the appreciation and encouragement which a competent superintendent can bestow.

This scheme contemplates the creation of a new profession—that of superintendent of schools; and it may be asked how is the needed professional training to be obtained. The answer is, at the normal schools. Had one-fourth of the money which has been spent during the last twenty years on the training of common school teachers been devoted to the training of superintendents, and had the office of superintendent been made sufficiently remunerative and reasonably permanent, the results would have been much more satisfactory. Money has been invested at simple interest, when it might have been earning compound interest. For example: The state spends $200 in educating a teacher. The money is well spent, for this teacher does more work, and better work, than she would have done without this preliminary training. At the end of four years she retires, and an untrained teacher takes her place. Her work is ended. If a trained and well-qualified superintendent of schools had been sent out in place of the teacher, at the end of four years there would have been fifty schools of the first class, instead of one. Statistics show that it has been impossible hitherto, and reason proves that it will be impossible for a century to come, under present conditions, to place a well-trained teacher in every school in the country. But there is no insuperable

difficulty in the way of placing a well-trained superintendent in every county, and in every town. The first step is the only costly one. It is for the people to determine that a well-organized system of superintendence is the cheapest, the quickest, and the most effectual way of obtaining a constant supply of efficient teachers. The means of professional education, confessedly inadequate to the wants of the great army of teachers, is amply sufficient for the officers. The Normal School has been compared to the West Point Academy. Of what avail would West Point be, if its resources were applied to the instruction of private soldiers? We have in this country the material for a grand army of teachers, if we would only furnish them with capable officers. Unfortunately, in some instances the privates know more than their official superiors.

GRADED SCHOOLS.

It is tacitly assumed by superintendents, teachers and parents that all children of about the same age have equal or nearly equal mental ability.

It is also tacitly assumed that an examination is a fair test of the progress which children have made in mental development.

Both assumptions are unwarranted.

So far from children being nearly equal in mental power, they differ so widely that it is difficult to strike an average that will not manifestly be unfair to those at either pole. We have many instances on record of childen of five years or under who learned the alphabet in one lesson. We have also many instances of children of the same age who went to school for six months (say one hundred days) and received two lessons a day on the alphabet and did not know their letters perfectly at the end of that time. The ratio is as 200 to one. Give two boys of the same age a column of spelling to learn in five minutes; one boy will spell twenty words correctly, the other only ten; a ratio of two to one. (This does not mean that the first is twice as capable as the second, but merely that the second needs twice the time of the first.)

It may be said that these apparent differences of mental power are due to different degrees of attention and industry. But are not attention and perseverance mental powers for all practical purposes? True, they are more dependent on the will than memory and judgment are. But does not will-power vary as widely as attention or memory? A due consideration of the facts suggested by these remarks will lead to the conclusion that any system which requires unequal forces to perform equal work in equal times rests on a false foundation, and must yield unsatisfactory results.

But, secondly, it is not true that an examination as ordinarily conducted is a test of mental growth.

It will be granted at the outset that the true purpose of intellectual education is not the accumulation of knowledge, but the acquisition of power. A lad studies the theorems of geometry not for the sake of the conclusions, which could all be learned in a week, but for the sake of the mental discipline which this study secures. Suppose two boys to have equal powers of reasoning, but very unequal powers of memory; and suppose them to have devoted equal time to the study. They have evidently derived equal benefits. But at an examination one may make 100 per cent. and pass with eclat; the other may make 50 per cent. and be rejected and disgraced. An examination ordinarily tests nothing but the memory, and only one kind of memory.

What then? Shall there be no examinations, no promotion, no classification? Certainly all three must be retained—examinations for the sake of the teacher, that he may know the exact position of the pupil, and direct his course accordingly (as the mariner finds his latitude and longitude, not with the idea that it adds to the motive force of his ship, but that he may steer it rightly). Promotion and classification must be made for the sake of the pupil and the system. An ideal method would study the individual peculiarities of every pupil and adapt the curriculum and the methods to such peculiarities. Practical common-school education in the so-called graded schools cannot deal to any great extent with the

individual, but only with the class; and it should be the aim of the supervising authorities to reduce to a minimum the evils that necessarily follow from this departure from the ideal. How shall this be done?

EXAMINATIONS.

As the ordinary examination tests only the memory, forms of examination should be devised which shall bring the other mental powers into notice. With some exceptions, *no question should be asked which can be answered in the exact words of the text-book.* The compulsory memorizing of definitions in arithmetic, grammar, and geography should be given up. The rules of arithmetic and grammar should be abandoned, also, as compulsory studies. No conscious effort should be made to remember long descriptions in geography or narratives in history. If the subjects named are properly taught, enough will remain in the mind without conscious memorizing; and it will remain longer, forming, as it were a part of the mental organism, and not likely to be swept away as so much rubbish when the examination day is over.

MEMORY.

Is the voluntary memory then to be discarded? By no means. It is merely to be kept in its proper place, and restricted to its proper work. Spelling is, in our language, unfortunately, a province which the memory only can conquer, though even here it is the memory of the eye that needs to be exercised, through the medium of books; not the memory of the ear by means of the long columns of the spelling book. In arithmetic the multiplication table must be memorized, but not until it is comprehended. Many other useful tables must also be committed to memory. A few leading formulas in algebra and trigonometry are also indispensable to students of these subjects.

In every department of learning the memory may profitably be employed as a labor-saving and time-saving machine. We must learn to spell all the words that we are likely to use, because we must save the time and labor that would be

lost in consulting a dictionary. But if the chances are that we shall employ a certain word but once in a lifetime, it is better to wait for the occasion and refer to the dictionary than to burden our memories with it, more especially as it is very likely that the memory may fail us just when it is most wanted. The same general argument applies with even more force to thousands of statements in grammar, history and geography, which children are compelled to memorize, to recite, and to forget.

Let it be observed here that the memorizing of that which is allowed to be speedily forgotten does not strengthen the memory, but weakens it. The practical inference is that the things to be memorized should be comparatively few in number, and these few should be so fixed in the mind by repetition and by practical use, as to become a part of the permanent furniture of the mind.

LITERATURE.

Perhaps the least objectionable service in which the memory can be employed—outside of its economic use as a saver of labor—is in the field of English literature. Beginning at an early age with short sentences and stanzas adapted to the very young, the child may, year after year, store his mind with some of the choicest gems of the language. Constant reviews may keep them green in his memory, and in maturer years they will bloom afresh when the demand is made. The stupidity of the goody-goody books, the insipidities of the weekly novelettes, the monstrosities of sensational novels, the lurid glare of vicious romances, will have no attractions for the youth whose memory is filled with specimens of the best and purest of our English authors. It is the empty house that welcomes the bad tenant.

It must be borne in mind that our knowledge is not confined to that which we have consciously memorized. On the contrary, far the largest and certainly the most important part of our intellectual store came to us, we know not how; and while the results of our school-boy memorizing have vanished as the early cloud and the morning dew, all that we

have gained by *doing* rather than by *saying* still remains with us. The restriction of the memory of school children to its proper functions, and the more energetic employment of the reason and the imagination, will cause not a diminution but an increase of useful knowledge.

DIFFERENCES IN ABILITY.

The examination should also make due allowance for differences of natural talent and for variations in external circumstances. Twelve questions might be selected, so that six of them could be answered by all but the very dullest, or the most careless, in the class; nine by the average of the class, and twelve by only the very best students. Those who answer one-half of the questions should be reported as having "passed." Promotion should be the rule; failure the rare exception. The examination should be looked forward to with pleasure, and not with dread. The man in perfect health does not fear to have the physician feel his pulse. When school-work has been done regularly and honestly, the examination, if properly conducted, will simply make that fact known. In former years the rod was the stimulus which every child was supposed to need. In these days examination is the stimulus. Of the two, the rod is the least dangerous. The only proper stimulus for young pupils is good teaching. The unspoiled mind has as keen an appetite and as good digestion as the unspoiled stomach, different in different individuals, but sufficient in every case. But badly selected and badly prepared food, bodily or mental, will ruin the best of appetites.

HOME LESSONS.

Beginners, say between the ages of six and ten, should do all their school-work within school hours. Home lessons for such children are an injury to the home, to the school, to the child and the teacher. To the home, because they add to the already over-burdened mother the unnecessary labor of making the children "get their lessons;" to the school, because so much time is occupied in hearing recitations that

none is left for teaching; to the child, because the pleasure of receiving instruction is neutralized by the dread of "missing his lessons;" to the teacher, because he is made the slave of the text-book, and "the day that makes a man a slave takes half his worth away." It may also be urged against the traditional home lessons, that the mental strain of six hours work in a well regulated school is as much as the ordinary child of ten years can bear without serious injury.

IMPROVED METHODS OF TEACHING.

The school is a conservative institution. Customs are handed down from generation to generation, and are regarded as sacred merely because they are old. The teacher who would introduce any new thing finds himself obstructed by the inertia of traditions, as vague, but at the same time as hard to get rid of, as the superstitions that attribute certain occult virtues to the rays of the moon.

When the Maryland school system was organized, in 1855, the methods of teaching in vogue were the same as those of Shenstone's schoolmistress. When a child first came to school he was made to learn his A, B, C's. This occupied some weeks. Then he spelled his a, b, abs, and his b, a, ba's. At the end of a year he could spell and pronounce as far as "baker." In his second year he could spell and read in some easy book, and in the third year he began to read without spelling.

The first change was the introduction of the word method, or, as the English call it, the "look and say" plan. The principle on which it is founded is that it is easier for a child to remember the names of words than the names of letters, and that from a limited number of key words thus learned a very great number of other words can be formed by various combinations of the key words. Then came the phonic system, which differed from the alphabetic mainly in that it substituted the powers of the letters for their names. If our language were phonetic, or nearly phonetic, this method would be perfect. Afterwards there came a glimpse of the truth that children learn by *doing* more than by merely looking and saying, and they were required to print on slates or

on the blackboard the words they were learning. This was a wonderful advance on the A, B, C plan; but it was soon found that printing is a slow process, both for teacher and pupil, and it was found possible to substitute writing of the ordinary style for it, not only without disadvantage but with positive benefit. Writing, which under the old regime was commenced in the fourth school year, is now made the very first lesson, and reading is to some extent merely an incident of the writing lesson. One might suppose that no further improvement is possible; but when the old ruts are once abandoned it is hard to tell where the triumphal car of progress may carry us. It has been proposed of late (and it is said the experiment has met with success) to make both reading and writing the subordinate incidents of a scheme of real instruction. The teacher presents an object to a class of children; they examine it; are questioned on it; their ideas are expressed in sentences; these sentences are written on the blackboard, and form a first reading lesson. The formal knowledge of reading and writing is thus made a subordinate element in a scheme of real instruction, and an acquaintance with *things* takes precedence of mere *verbal* training.

It must be acknowledged with regret that there are schools still in our state which have not advanced beyond the old alphabetic stage. How long it may be before they shall awake from their slumbers depends more on the county examiner than on any other agency. If public opinion were aroused, the antediluvian teacher would be obliged to retire. But who will arouse public opinion?

BALTIMORE CITY.

After a period of comparative repose the city of Baltimore has taken two most important steps, which deserve more than a passing notice.

FREE BOOKS.

The book fee has been abolished. Public opinion demanded it, and the City Council gracefully yielded. The odious dis-

tinction between "pay pupils" and "free pupils" has been obliterated. Books are now furnished in the same way as desks, black-boards, and pencils; and the schools at last are really free.

MANUAL TRAINING SCHOOL.

The second noteworthy step was the establishment of the Manual Training School. This is the first instance of a school of this kind and grade being opened and conducted under the authority and control of the public school authorities, and its history and progress are consequently watched with great interest. I have therefore given in the appendix to this report the full and interesting account of the school, kindly furnished by the director, Dr. Richard Grady.

NIGHT SCHOOL FOR MANUAL TRAINING.

There are many boys in need of such training, and anxious to get it, who cannot go to an all-day school. For their benefit, and for the benefit of those who have not reached the standard required for admission to the day school, it has been suggested that a number of night schools should be opened. The cost would be small, for the "plant" would be inexpensive, and skilled mechanics could be procured as teachers at night at a moderate salary. These schools would bear such a relation to the Manual Training School as the grammar schools bear to the City College. For the first year work in wood only need be taught. In the second year the fundamental processes in iron work might be practiced. No machinery should be employed—nothing but hand tools. Many a boy would be kept off the streets and saved from vice, if such employment were within his reach. The penitentiary has more inmates who can read and write than good tradesmen.

TRAINING-SCHOOL FOR TEACHERS.

Still another step needs to be taken. The practice of taking young girls from their students' desks and giving into their hands, without assistance and without experience, the charge of fifty or sixty children, cannot be long continued

without serious detriment to the schools. The State Normal School receives every year its full quota of students from the city. The theory of teaching is carefully taught them, but they cannot get the special training that is needed in the city schools. Besides, not more than 15 per cent. of the city teachers have attended the State Normal School. It is impossible to consider this subject calmly and dispassionately without coming to the conclusion that it is the duty of the Board of Public School Commissioners to provide thorough training for their young candidates for the office of teachers, and to apppoint only those who have had such training. A certain term of probation is even now exacted, but in practice it has become a mere form. What is needed is not probation, but training.

COLORED NORMAL SCHOOL.

This school still continues its good work. Since its origin it has sent out over two hundred teachers, and many of them have done good work. The number of pupils now in attendance is 182, most of them girls. But few young men are in training, because their time can be profitably employed elsewhere, and they are unable to meet the expense of remaining at school long enough to derive much benefit. Many of the young women now in attendance give promise of becoming efficient and faithful teachers.

MARYLAND INSTITUTE.

The Schools of Art and Design, connected with the Maryland Institute, have enjoyed another year of prosperity, so far as the work of the teachers and the students is concerned. It is much to be regretted that the pecuniary resources of the Institute are not equal to the task it has assumed. Unless the liberality of the city, or the benevolence of private citizens comes to the rescue, this school year will close with a heavy indebtedness, and the work of next year will be seriously injured.

The present awakening in art and industry has been very largely owing to the exertions of the Maryland Institute, and

it would be cause for profound sorrow if the great work now going forward should be interrupted or impeded. There are now attending the several schools 618 students—219 in the day school, including 88 in the Saturday class, and 369 in the night school. In the day school 58 are regular students, who propose taking a full course of three years; 71 are in the elementary class, and the remainder are studying charcoal drawing, painting in oil and water colors, and modelling. In the night school 153 students are in the free-hand division, 132 in the mechanical, and 84 in the architectural class. One cannot for a moment imagine that these schools, the pride and the ornament of our city, shall be permitted to suffer for want of funds.

JOHNS HOPKINS UNIVERSITY.

After a series of tentative stages the University has taken a definite, and within certain limits, permanent form. The undergraduate curriculum has been fully developed, and the college is recognized as part of the University. The several courses, now explicitly set forth, afford abundant room for choice, and yet secure to the student who selects any one of them the means of education at once harmonious and varied.

During the academic year which closed on the first of September, 1884, the academic staff included forty-nine teachers; and two hundred and forty-nine students were enrolled, of whom one hundred and twenty-three were residents of Maryland, and one hundred and eleven came from twenty-nine other states of the union, and fifteen from foreign countries. One hundred and fifty-nine of these students were graduates of other institutions, and came from seventy-five colleges and universities, fifty-three were candidates for the degree of Bachelor of Arts, and thirty-seven were special students.

The steady increase in the number enrolled yearly since the university was opened in the autumn of 1876, is shown by the following figures: 1st year, 89; 2nd, 104; 3rd, 123; 4th, 159; 5th, 176; 6th, 175; 7th, 204; 8th, 249. The total for eight years is 648 students, of whom 329 were from Maryland (including 263 from Baltimore), and 319 from forty-two other

states and countries. Of this number 395 persons pursued courses as graduate students, and 253 as collegiate students. For the ninth academic year, commencing October, 1884, the number enrolled is 274.

Since degrees were first conferred, in 1878, seventy-nine persons have attained the Baccalaureate degree, and fifty-four have been promoted to the degree of Doctor of Philosophy.

The two new laboratories, one for chemistry and one for biology, which were completed in 1883, have proved entirely satisfactory.

The chemical laboratory covers an area of about fifty by one hundred feet and has three full stories and a basement. It will conveniently accommodate about ninety working students.

The biological laboratory is eighty-four by fifty-two feet in external measurement, and consists of three stories and a basement. It contains a lecture room with seats for sixty; a general laboratory with accommodations for about fifty working students; a library; smaller laboratories for different researches; large work rooms, etc., with every convenience for the various branches of scientific studies pursued therein. A gymnasium has been built and fitted up with a good selection from the Sargent apparatus. Bath rooms and a ball court are adjacent to the principal room.

Besides the university circulars and annual reports, there are five important publications issued under its auspices, namely: The American Journal of Mathematics, American Chemical Journal, American Journal of Philology, Studies from the Biological Laboratory, and Studies in Historical and Political Science.

The library has continued to grow rapidly, and now numbers over 24,000 bound volumes, and 500 periodicals are regularly received in its reading-room.

The mineralogical cabinet, also, has been greatly increased by the purchase of collections and by the presentation of specimens.

The Chesapeake Zoological Laboratory was opened at

Hampton, Va., during the summer of 1884—its seventh annual session.

Considerable attention has been given of late to the details of collegiate instruction. Seven courses of study have been arranged, each of which is believed to be good for a certain class of minds; each of which contains indispensable studies; each of which combines mathematics and physical science with languages, literature, philosophy and history.

In determining what course to follow, the student has the counsel of a member of the board as his adviser, and he is not allowed to change from one course to another without very special reasons, approved by the entire board. All the courses lead to the same degree, that of Bachelor of Arts, which can usually be gained three years after the matriculation is completed. Good students are allowed one year for completing the courses required for matriculation, and thus the time devoted to the college courses corresponds with that which is usual in American colleges. The desire is to receive scholars about the age of sixteen, and to graduate them about twenty years of age, so that one, two or three years of non-professional university studies may be pursued by recent graduates, looking forward in many cases to the second degree of Master of Arts and Doctor of Philosophy, and in other cases to special proficiency in certain branches of study.

STATE COLLEGES.

The state appropriation has been withdrawn from the Agricultural College, and the usual grant to St. John's has been greatly reduced. Nevertheless these institutions have maintained their organization, and are probably at the present time more deserving of state support than they ever were before. The other colleges receiving state aid—the Western Maryland College, Washington College, the Baltimore Female College and Frederick College, are pursuing the even tenor of their way.

The state undertook to assist these institutions, and most of the academies, under circumstances entirely different from

those by which we are now surrounded. It would be a measure of wise economy to adapt the state patronage to these circumstances. No such measure is possible during the excitement and hurry of a legislative session without much previous preparation. The whole ground should be carefully surveyed before any alterations are proposed. If an act were passed by the General Assembly authorizing the Governor to appoint a commission to report on this subject, the information could be procured on which the next General Assembly thereafter could act intelligently.

TEACHERS' INSTITUTES AND ASSOCIATIONS.

Teachers' institutes were held in several counties during the year, and were well attended. Almost every county has a county teachers' association, which meets regularly and does excellent service. The State Teachers' Association met at Ocean City in July. The attendance was good, and the exercises were full of interest. The next meeting of the association will be held at Deer Park on the 7th of July, and the three following days.

IN MEMORIAM.

One of the most active members of the association at Ocean City was Charles G. Edwards, assistant superintendent of schools for the city of Baltimore. On the third day of the meeting he was taken suddenly and seriously sick, and three months afterwards (October 12, 1884) he died. By his death the city lost a faithful officer, whose worth was just beginning to be appreciated; the state lost a prudent counsellor, the country lost a rising leader of the educational forces, and the writer lost a constant, faithful, loving friend.

"Multis ille bonis flebilis occidit,
Nulli flebilior quam" *mihi.*

M. A. NEWELL,
Secretary.

REPORT

OF THE

SCHOOL COMMISSIONERS

OF

BALTIMORE CITY.

BALTIMORE CITY.

SUMMARY STATEMENT, SHOWING THE NUMBER OF SCHOOLS, TEACHERS, PAY PUPILS, FREE PUPILS, ON ROLL NOVEMBER 20TH, 1884; AVERAGE ATTENDANCE, PERCENTAGE OF ATTENDANCE AND NUMBER OF PUPILS IN SCHOOL DURING THE YEAR.

BALTIMORE CITY.

The amount appropriated by the City Council for the current expenses of the School Board of this city for 1884 was	$660,000
And for the Manual Training School	7,000
And also, for a house adjoining No. 20	3,000
	$670,000

The whole amount was expended as follows:

On Account of White Schools.

For salaries	$485,700 33
" rents and ground rents	27,747 78
" books and stationery	36,377 99
" repairs and cleaning	5,180 25
" heating apparatus and its repairs	8,390 07
" furniture	6,226 82
" fuel	14,322 13
" incidentals, printing, supplies, etc	7,277 64
" house at No. 20	3,000 00
" Manual Training School	7,000 00
	$601,223 01

On Account of Colored Schools.

For salaries	$57,329 65	
" rents and ground rents	3,774 75	
" books and stationery	3,466 28	
" repairs and cleaning	678 86	
" heating apparatus	1,085 13	
" furniture	365 10	
" fuel	1,830 03	
" incidentals	247 19	
		$ 68,776 99
		$670,000 00

There was also expended by the Inspector of Buildings:

For new buildings	$22,365 93	
" repairs to old buildings	8,986 60	
		$ 31,352 53
Total by the Board and the Inspector		$701,352 53

Receipts.

Amount received from City Collector—taxes	$457,225 07
" " " State of Maryland	158,001 67

REPORTS

OF THE

SCHOOL COMMISSIONERS

OF

THE COUNTIES.

ALLEGANY COUNTY.

THOMAS G. McCULLOH, *President.* H. G. WEIMER, *Secretary.*

Professor M. A. Newell.

DEAR SIR: We herewith transmit to you the Annual Report of the Public Schools of Allegany county for the year ending September 30, 1884.

Visitation—The work of visiting schools was commenced as soon as I entered upon the duties of my office—January 1, 1884. The following plan was adopted in this department of my work: I carefully note the condition of the grounds and buildings, the kind of furniture, the amount of apparatus, the classification, the grading, the course of study, the character of the work performed, examine classes, and render assistance, make suggestions, give advice, &c., whenever I deem it proper to do so.

School Trustees—No class of persons sustain a more responsible relation to our educational interests than do school trustees. If the schools are well equipped, skilfully managed, in a prosperous condition, with a hearty educational sentiment pervading the school district, these officers are chief instruments in securing such results. If the school-houses and furniture are in a dilapidated condition, the school poorly taught, the school trustees are in a measure responsible for such state of affairs. The faithful discharge of duty as a school trustee requires the sacrifice of time and effort, for which no remuneration is provided in the way of salary. Without stopping to argue whether this is as it should be or not, suffice it to say that the person who performs his duty in this capacity will not lose his reward.

Progress—In general, I may say that the progress made in the school affairs of the county has been very fair and encouraging, and that the public schools are steadily improving in worth, and constantly advancing in popular favor.

The debt of the board appears to have increased $1,453.58 during the past year. This is accounted for in part by the payment of floating indebtedness of the former board, amounting to $700.45, which existed prior to October 1, 1883, but did not appear in last year's report. The debt is therefore really increased $753.13, which is fully accounted for by the expenses required for teachers' salaries, &c., incidental to the increased attendance of pupils, there having been 171 more than the previous year.

Very respectfully,

H. G. WEIMER,

Secretary.

ALLEGANY COUNTY—SUMMARY OF SCHOOL STATISTICS.

For year ending September 30, 1884.

	1884.	1883.
Number of school-houses	83	..
Number of male teachers—principals—(white, 47; colored 2; total, 49)	49	46

BALTIMORE COUNTY.

Professor M. A. Newell:

The Annual Report of the Schools of Baltimore county is herewith respectfully submitted.

Although the Board has changed its entire personnelle since our last report, the good work still goes on, both the enrollment and attendance of pupils being larger than in any former year. The gentlemen composing the new Board are all progressive in their ideas, and thoroughly imbued with the importance of public education. There can be no hindrance to the continued success of the schools under their administration, unless it arise from the financial embarrassment which they found existing when they came into office. This was caused in part by new buildings erected in former years, absolutely required and demanded by the patrons and the continuous growth of the system, without any proportionate increase in the county levy. Since 1879, $85,000 has been uniformly levied for the schools each year, with the exception of the present, when it was raised to $100,000. For the same time the average yearly increase in pupils enrolled has been 300, adding about $5,000 annually to the ordinary expenses, without including building, repairs, or furniture, for which no provision has been made, although the taxable basis has been advanced in round numbers from $57,000,000 to $61,000,000, and the population of the county is rapidly growing.

For the past two years the entire expenses of the spring term have been met by borrowing the necessary amount from

the bank and paying the notes as they became due from the levy of the next year. The County Commissioners' fiscal year ends on the 30th day of May, and the School Board's the 30th of September, one month after the schools have commenced operations for a new year. This conflict of dates makes it difficult to determine the real financial condition of the schools at any given time; but, as near as we can approximate, the present indebtedness is something over $36,000. The policy of temporarily bridging over by borrowing may answer for a short time, but this debt, like the school-boy's lump of snow, will continue to enlarge the farther it is pushed, and may at last become unmanageable. The time for a trial balance has arrived, and unless the people signify a willingness to make good this deficit in the next tax levy, the schools may be sadly crippled for years to come. If the deficiency is not made good by taxation, it can be supplied in only one of two other ways—by closing the schools, or by reducing teachers' salaries, either of which would, in our opinion, seriously interfere with the efficiency of the school system. Should it come to a choice of evils, it would do the least injury to close the schools for the summer term. Fewer pupils are then enrolled, and the majority of those attending school are the younger children, who can best afford to lose the time from their books. All interested would suffer alike, and this plan would at least have the advantage of being honest. By awakening public criticism, it would be the surest safeguard against the recurrence of any similar disaster. On the other hand, to reduce salaries to get out of the difficulty would be worse than repudiation. The teachers are in no way responsible for the creation of this indebtedness. It was incurred at the urgent solicitation of the tax-payer for building and equipping new houses to accommodate his children, and every district in the county bears witness that he has received full equivalent for the money thus expended. The teachers contracted to do a certain work at a stipulated price, and, with few exceptions, this work has been done conscientiously and satisfactorily. There would be as much injustice in curtailing their salaries to make up this deficiency as there would be to

demand a proportion of the salaries of all other county officials for the same purpose.

Nor is this the first time the School Board has been involved in pecuniary difficulties. In the spring term of 1875 a similar condition of affairs existed, and the Board, from overbuilding, was carrying an indebtedness of $30,000. An order was adopted, notifying the teachers that unless this amount was included in the levy to be made on or before the 1st day of May, the schools would be closed for the remainder of the summer term. The County Commissioners declining to render any assistance beyond the usual levy, the question was submitted to the people, and public interest was intense. Committees of representative men from the most wealthy and populous school districts in the county appeared in person before that Board, and, besides, a petition was presented with 1,700 signatures of tax-payers, asking for a sufficient levy, not only to pay the existing debt, but for the proper maintenance of the schools as well. In spite of the fault-finding of a few chronic grumblers, through the press and elsewhere, the will of the people was respected. The levy was raised from fourteen to eighteen cents, the debt cancelled, and the prosperity of the schools secured. As all the members of the present Board of County Commissioners are known to be friendly to the cause of public education, and as one of them is proud to be numbered among the petitioners of 1875, it is to be hoped that when his colleagues fully understand the exigency of the present case, they will not be slow to come to the rescue of the schools and the relief of the present School Board.

The following table gives the total cost of the schools, and the cost of each pupil, based on the average enrollment from the time the present system went into operation down to 1884. Items directly controlled by the Board at all times—such as building, repairs and furniture—are deducted from the total cost to get the actual minimum running expenses for any one year, and this amount divided by the average number of pupils enrolled will give the cost per pupil:

Year.	Total cost of schools.	Building, repairs and furniture, etc.	Minimum running expenses	Average number pupils enrolled.	Average cost per pupil.
1869	$ 92,705 51	$ 5,091 11	$ 87,614 40	5,378	$16 29

1882	169,452 15	33,691 65	135,760 50	8,843	15 35
1883	159,447 40	21,851 02	137,596 38	9,283	14 83
1884	163,200 33	16,797 48	146,402 85	9,909	14 77

The average annual cost per pupil for these sixteen years is $15.29, and the average increase of pupils is nearly 300. Assuming this number for the increase next year (and it will be very much greater), there will be an enrollment of 10,200 pupils to provide for in the levy to be made on or before the 1st day of May, 1885, besides the deficiency of $36,000. It does not require much mathematical calculation to determine that, without building, repairs, or furniture, the ordinary running expenses of the schools for the ensuing year will aggregate $155,958. All the revenue the Board has, apart from the county levy, is $61,900 a year, received from the following sources: State school tax, $36,000; state appropriation to colored schools, $4,400; free school fund, $3,300; academic fund, $1,200, and book fees, $17,000, leaving a fraction over $94,000 for the County Commissioners to provide for by county taxation. It would be poor economy to let the property of the county run down for the lack of a few dollars spent for repairs at the right time, and new pupils must be

provided with suitable accommodations. To allow $6,000 for these two items would be a small sum, and this would make the amount to be levied next year for the minimum expenses of the schools $100,000, which is a little over 16½ cents on the hundred dollars.

The natural growth of the system, requiring more children to be educated, more school-houses and furniture every succeeding year, has made a proportionate increase in the cost unavoidable. It is absurd to expect any board to operate the schools for the same amount of money as was sufficient five or ten years ago. At last it has come to the question of more money or less schooling, and we have sufficient faith in the intelligence and common sense of the people of this county to believe that they are in favor of continuing their schools, and are willing to pay to keep them up to their present high standing. If retrenchment is to be the watchword, they would prefer it to begin with some of the luxuries for which the whole county is taxed, and the masses receive very little benefit.

We have endeavored to give a brief, but fair and impartial statement of the financial condition and the needs of the schools, and we now leave this important interest in the hands of those who hold the purse-strings of the county, trusting that they will give it the careful consideration which the importance of the subject and the best interest of the county demand.

THOS. C. BRUFF,
Examiner.

BALTIMORE COUNTY—SUMMARY OF SCHOOL STATISTICS.

For Year ending September 30, 1884.

	1884.	1883.

CAROLINE COUNTY.

JOHN F. DAWSON, *President.* JAMES SWANN, *Secretary.*

DENTON, November 14, 1884.

Professor M. A. Newell.

DEAR SIR: We herein send you our Annual Report of the Public Schools of this (Caroline) county for the scholastic year ended June 30, 1884, and the fiscal year ended September 30, 1884.

We were compelled to close our schools after having kept them open but three terms—first, because the County Commissioners did not levy as much as they were asked to levy for schools, and secondly, because the present Board of County Commissioners would pay but half the levy.

We lost one house by fire, but received the insurance and built another.

Respectfully submitted,

JAMES SWANN,
Secretary.

CAROLINE COUNTY—SUMMARY OF SCHOOL STATISTICS.

For year ending September 30, 1884.

Balance cash on hand	232 39	
		$2,413 32

CARROLL COUNTY.

I transmit herewith the Report of the Public Schools of Carroll county for the fiscal year ending September 30, 1884. I think no further explanation of its contents is required than what follows. The item of "office expenses" is larger than usual, owing to the cost of fitting up new offices, which were set apart for the use of the Board in the extensions to the court-house. That of "printing and advertising" is swelled beyond the usual figures by reason of new regulations, requiring many new forms and additional notices to persons interested.

JAMES A. DIFFENBAUGH,
Secretary.

CARROLL COUNTY—SUMMARY OF SCHOOL STATISTICS.

For year ending September 30, 1884.

	1884.	1883.

CECIL COUNTY.

F. S. EVERIST, *President.* JOHN SQUIER, *Secretary.*

Professor M. A. Newell.

Dear Sir: In our Report of the condition of Public Schools of the county, we have nothing of special interest to communicate, except that in the falling off of the state appropriations we have been much embarrassed in our finances.

As the distribution of the funds of the state to the white and colored schools, as now arranged, operates unjustly to our county, and some of the other counties of the state, we would respectfully ask the State Board of Education to take measures to have a more equal distribution of these funds. Some counties are receiving from the state one-third more per pupil than others, and we think this a just cause of complaint; and we hope you will call the attention of the next legislature to this subject.

Very respectfully,

JOHN SQUIER,
Secretary.

CECIL COUNTY—SUMMARY OF SCHOOL STATISTICS.

For the year ending September 30, 1884.

	1884.	1883.
Number of school-houses	84	..
(Frame, 59; brick, 14; stone, 11.)

CHARLES COUNTY.

PORT TOBACCO, October 30, 1884.

Professor M. A. Newell.

DEAR SIR: I herewith respectfully forward to you the Annual Report of the Charles County Public Schools for the scholastic year ending June 30, 1884, and for the fiscal year ending September 30, of same year. I have nothing to present to your consideration outside of the statistical report, save the irregularity in the amount of the quarterly distribution of the state school tax. I have been a chronic complainant on this matter, because I suffer, year after year, the many ills occasioned by these irregularities. The Comptroller, I am sure, distributes all funds that come into his hands promptly, and as the law directs. The fault seems to lie in the state collectors, who fail to collect and turn over promptly to the Comptroller the state taxes. I would be pleased to see the State Board of Education take this matter in hand and press upon the legislature of our state the almost absolute necessity of placing the school tax upon some firm and unvarying basis of distribution With regards, I remain,

Very truly, yours,

A. W. NEALE,
Secretary.

CHARLES COUNTY—SUMMARY OF SCHOOL STATISTICS.

For year ending September 30, 1884.

	1884.	1883.
Number of school-houses (frame, 63; log, 3)	66	66

DORCHESTER COUNTY.

L. D. TRAVEN, *President.* JAS. L. BRYAN, *Secretary.*

As the annual reports to the State Board of Education generally record the encouraging features of school work, it would seem that a review of that work, with the object of recalling mistakes and errors, with brief suggestions of improvement, might be of advantage, and would, at least, vary the character of the usual "accompanying remarks."

My long connection with the schools of this county, extending over nearly eighteen years, satisfies me—

1. That it is better to increase the number of school districts slowly. In a few years the most inviting calls for new schools in the rural districts prove to be delusive, in consequence of removals, &c.

2. That small, cheap, temporary houses are generally the most expensive. When a school is demanded, build a good one, somewhat larger than the immediate demands would seem to call for.

3. Always build suitable out-buildings. Nothing can be more demoralizing for children than deprivation of these necessary buildings.

4. A school-house cannot well have too much blackboard surface. Less than 100 square feet is simply getting on without these necessary adjuncts to good schools.

5. The use of maps, globes, organs, easy calisthenics, and simple drawing lessons cannot be undertaken too early. They draw pupils to the schools, and make them happier, wiser and better.

6. Double desks, or, better, single ones, should be found in every school.

7. Recess time should be arranged so that the sexes shall not be out of school at the same time.

8. The more time the examiner can give to the examination of the schools, and interesting the people in their own schools, the more valuable his services will become.

9. Not more than one district school trustee should be appointed for each school. One may do some good; three rarely do anything. If teachers' probate of their accounts is required, the trustee could administer the oath.

10. Free books in free schools everywhere.

11. That the state school tax should be increased.

12. That the county school levies ought not to be reduced.

13. That in any connection of the public school system with the academies, the real control of the academies should be in the county school board. It is better to have *one* head to such arrangements than *two*. *One* poor general can command an army better than *two* good ones.

14. Postal card weekly or bi-weekly reports from teachers, showing daily attendance, weekly average, &c., are most useful.

15. That it is better to follow the school law and by-laws closely. Exceptions always lead to trouble. Any action in regard to trustees, teachers, schools, &c, should be based upon the letter and spirit of the law.

16. Although the Normal School cannot possibly supply the demand for teachers throughout the state, yet its influence for good is acknowledged wherever one or more of its pupils are employed. They always do good by example. In time the little leaven will leaven the whole lump.

JAS. L. BRYAN,
Secretary.

FREDERICK COUNTY.

FREDERICK, November 12, 1884.

The Annual Report of the public school work for the year ending September 30, 1884, does not reflect much credit on Frederick county.

Our schools were not opened until the 1st day of November, and closed on the 15th day of April, giving but five and a-half months during the scholastic year ending June 30, 1884. This, and the prevalence of measles throughout the county, will account for the heavy falling off in the enrollment and average attendance.

By using the receipts from the county and state in October to reduce the heavy debt resting upon the Board at the close of the last fiscal year, we were enabled to open our schools promptly on the 1st day of September this year.

We are pleased to state that the County Commissioners have been led to realize the importance of an increase in the appropriation from the county, to meet the constantly increasing demands for more and better school facilities.

As an evidence of this, they have increased the levy for public school purposes 2½ cents on the hundred dollars, making it 12½ cents, instead of 10, as heretofore. Although this is not sufficient, it gives us great encouragement, and we promise a good showing for the present scholastic year.

Respectfully,

D. T. LAKIN,
Secretary.

FREDERICK COUNTY—SUMMARY OF SCHOOL STATISTICS.

For year ending September 30, 1884.

	1884.	1883.
Number of school-houses owned by the county, 130 (frame, 41; brick, 51; log, 17). Rented, 21

GARRETT COUNTY.

Professor M. A. Newell.

DEAR SIR: The nineteenth Annual Report of the Public Schools of Garrett county is herewith respectfully submitted.

During the year, besides running the schools the usual length of time, an indebtedness of $20,000 has been paid.

The report shows that disbursements have been made for building school-houses, and no new school-houses are reported. This will be readily understood when it is stated that the houses were unfinished at the close of the scholastic year, and cannot be reported until next year.

C. B. LUDWIG,
Treasurer, Examiner, &c.

GARRETT COUNTY—SUMMARY OF SCHOOL STATISTICS.

For year ending September 30, 1884.

HARFORD COUNTY.

ARTHUR VOSBURY, *President.* NOBLE L. MITCHELL, *Secretary.*

Professor M. A. Newell.

BELAIR, October 28, 1884.

DEAR SIR: The Annual Report of the Public Schools of Harford county is respectfully submitted. The school year just closed has been a very successful one. For the first time, under the present public school system, our schools were kept open for four full terms, and by reference to the within report, you will find that the enrollment and attendance far exceed last year's. We can, we think, safely say that our schools are steadily improving, and the work done is becoming more thorough and effective each year. The difficulties which have obstructed our progress in the past are gradually becoming less, and we hope in the near future to have surmounted them all, and know them only as things which were.

Our appropriation from the county was 16 cents on the hundred dollars, which was in excess of the state appropriation several thousand dollars. If the amount of money received from the state would equal that received from the county, we would be enabled to increase the salaries, which would induce our teachers to remain with us, and other good teachers to come.

Yours, very truly,

NOBLE L. MITCHELL,

Secretary

HARFORD COUNTY—SUMMARY OF SCHOOL STATISTICS.

For year ending September 30, 1884.

	1884.	1883.

KENT COUNTY.

RICHARD W. JONES, *President.* EBEN F. PERKINS, *Secretary.*

Professor M. A. Newell:

The tables contain about all the information we have to communicate.

One new school district has been laid out in the Second Election district of our county, in which a neat, comfortable and convenient school building has been erected. A school was opened September 1, with twenty-five pupils.

Our county Teachers' Association met regularly during the four terms of the school year, and is regarded by the teachers as a valuable aid to their school work.

EBEN F. PERKINS,
Secretary.

MONTGOMERY COUNTY.

A. B. DAVIS, *President.* S. R. WHITE, *Secretary.*

Professor M. A. Newell.

Dear Sir: In submitting the annual report for Montgomery County, your attention is called to the following, viz: The schools were open nine and one-tenth months, on a cash basis, the collectors paid up promptly. Five new houses erected and furnished. Two annual visits made by the examiner, and within the past four years about $5,000 worth of new text-books placed in the hands of pupils at a cost, all told, for freight, $100, thus bringing about a uniformity of books in the county of the latest and most improved books, involving, however, much labor in handling about 40,000 volumes on the part of the secretary.

In several localities diseases, incident to children, interrupted the attendance; still it will compare favorably with the past. We have ninety-three schools, with few exceptions, good houses, furniture and out-buildings, and the general interest of the people in education seems to be improving from year to year.

Very truly,

S. R. WHITE.

MONTGOMERY COUNTY—SUMMARY OF SCHOOL STATISTICS.

For year ending September 30, 1884.

	1884.	1883.
Number of school-houses—(frame, 72; log, 8; stone, 1)—and colored churches used for schools	93	91
Number of male teachers—principals—(white, 53; colored, 16; total, 69)	69	62
Number of female teachers—principals—white, 23; colored, 10; total, 33)	33	32
Number of female teachers--assistants--(white, 4; colored, 0; total, 4)	4	5
Total, (white, 80; colored, 26; total, 106)	106	99
Number of fenced lots	7	7
Number of schools having out buildings	88	85
Number of schools having sufficient blackboards	88	86
Number of schools having good furniture	88	86
Number of terms schools were open—(9 1-10 months)	4	4
Number of different pupils for the year—(white, 3,401; colored, 1,749; total, 5,150)	5,150	5,166
Number of pupils in average attendance	2,535	2,583
Number of pupils over sixteen years of age	380	333
Number of official school visits paid by Examiner	186	183

Number of Pupils.

PRINCE GEORGE COUNTY.

B. F. DUVALL, *President.* CHARLES F. BILLOPP, *Secretary*

Professor M. A. Newell.

DEAR SIR: We herewith send our Annual Report for the fiscal year ending September 30, 1884. You will find that the schools were kept open ten months, and that the number of pupils reported on the rolls is larger than ever before. The average attendance has also increased considerably. We have built and furnished one new school-house, and almost completed two others. The people of the county seem to take more interest in the schools than heretofore, and we hope to receive a larger appropriation from the county for next year.

CHARLES F. BILLOPP,
Secretary.

PRINCE GEORGE CO.—SUMMARY OF SCHOOL STATISTICS.

For year ending September 30, 1884.

	1884.	1883.

QUEEN ANNE COUNTY.

CENTREVILLE, October 16, 1884.

Professor M. A. Newell.

DEAR SIR: I am glad to be able to say in this my annual report that we are not going back. We feel the want of money to improve our school-houses and to make them comfortable. We greatly need a few more houses, and our people are anxiously asking for them; but our county authorities, in view of the many claims upon them, do not feel justified in making a larger levy than they have made. They gave us two thousand dollars more than the levy of any former year, and we expect to keep our schools open for ten months, but we cannot build houses that are needed. All the money we get is consumed in paying necessary expenses, exclusive of building. When our school system was inaugurated we received from the county the same amount to maintain forty-six schools that we have received for years, and from the state tax a much larger amount than we receive now to maintain fifty-nine. It is not generally known that the hundred thousand dollars paid to colored schools comes out of the tax levied exclusively for white schools, and that all the counties in the state are sufferers by this injustice—our county to the sum of nearly four thousand dollars, as we receive that much less than when the money to support colored schools was paid out of the general treasury. I think if the people of the state knew that the public schools hold a judgment against the state for nearly six hundred thousand dollars for taxes paid by themselves into the state treasury exclusively for public school purposes, and otherwise unjustly used for other purposes by a former comptroller (not the last one), they would demand of their rulers the passage of a law to pay this just and honest debt. There is one building going on in our

county, but not by the School Board, as the board is utterly unable financially, to do it. It is an addition to the graded school building at Church Hill, which is being put up by the liberality of some public-spirited gentlemen, who are furnishing the money and giving their time and attention to secure for their fellow-citizens a handsome and comfortable house—when the School Board is entirely unable to do it—upon the promise made by the Levy Court to reimburse them by a future levy. If they had not done this, some fifty children or more would have been turned out, and deprived of school privileges. They deserve and receive the thanks of the community.

I hope you will find my figures correct, and will have no trouble with them. I do not like long communications, and do not expect or desire this to be printed, and write it upon the impulse of the moment without any particular object in view. Hoping you may have a pleasant and prosperous year, I remain,

Very truly, your friend,

JAMES W. THOMPSON.

QUEEN ANNE COUNTY—SUMMARY OF SCHOOL STATISTICS.

For year ending September 30, 1884.

	1884.	1883.
Number of school-houses—(frame, 56; brick, 6)	62	..

		$4,442 53

SOMERSET COUNTY.

BERRY T. J. B. JONES, *President.* W. H. DASHIELL, *Secretary.*

Professor M. A. Newell.

DEAR SIR: I send you herewith our report for the year ending September 30, 1884. With but few exceptions, it explains itself. I call your attention to the number of teachers, which for this year is smaller than for 1883. This is due to the closing of several schools for re-building. In the statement of receipts and expenditures, the amount for teachers' salaries appears to be larger than it should be. This amount includes unpaid balances of last year.

Our funds have enabled us to keep our schools open for eight months only. During that time good work has been done, but the teachers are impeded in their work by lack of suitable school equipments, which want we are now endeavoring to remedy. We are working to raise the standard of our teachers by thorough examinations, and frequent visits to the schools.

Since the beginning of 1884 we have been trying the cash system of payments, and have found it a decided improvement over our old plan. We have also made improvements in the matter of our incidental expenses.

Very respectfully,

W. H. DASHIELL,

Secretary.

SOMERSET COUNTY—SUMMARY OF SCHOOL STATISTICS.

For year ending September 30, 1884.

	1884.	1883.
Number of school-houses—(all frame)	68	68
Number of male teachers—principals—(white, 15; colored, 11; total, 26)	26	..

ST. MARY COUNTY.

Professor M. A. Newell.

DEAR SIR: Do not believe much can be said in addition to what can be found in my report of last year, or that there are any new facts that should claim the attention of the State Board.

An examination of the statistical part of the report discloses an increased enrollment of nearly three hundred and an increased average attendance of over one hundred. The board, at its meeting February 5th, 1884, passed an order awarding three prizes to the white pupils of the public schools of the county, and three to the colored pupils, who should furnish, by the last of the school year, the three best original essays on subjects to be selected by the Examiner. The subjects selected were "Thought," "History," and "What Would Inure to the Benefit of St. Mary?" At each school these subjects were fully discussed and outlines given, requirements to prevent imposition being formulated and fully explained to the pupils.

The result, while much was accomplished, was not so gratifying as might be expected; still many essays were handed in, which, not only did credit to pupils, but were a strong argument in favor of our system of public education. Some of these essays were published in one of our county papers and in one of the Charles county papers, and have, it is believed, had a stimulating effect upon our public school children.

Our financial showing would have been better but for the falling off of the quarterly installments from the state; still we have cancelled an indebtedness of $2050.98, and shall be able to run our schools upon a cash basis for nine and a half months, unless for some unexpected and unaccountable failure in some of the funds usually collectible for the schools of our county.

Very respectfully,

FRANK N. HOLMES,

Secretary, &c.

ST. MARY COUNTY—SUMMARY OF SCHOOL STATISTICS.

WASHINGTON COUNTY.

Professor M. A. Newell.

Dear Sir: I submit herewith the annual report of the Public Schools of Washington County for the fiscal year ending September 30, 1884. During the past year a new school board has been appointed by the court, and the members have entered upon their duties with an energy and spirit which promise good results for the future.

The efforts of the new board were first directed to secure the passage of an act by the General Assembly of Maryland authorizing the County Commissioners of Washington County to issue bonds to the amount of $13,000 to liquidate the indebtedness of the school board. The bonds were accordingly placed at four per cent. and the proceeds turned over to the Treasurer of the School Board, who has at this writing paid off the debt of the board in full.

The board was enabled also to secure an addition of $5,800 to the local levy for the current year, of which sum $4,800 were appropriated for new houses.

Eight new buildings were placed under contract, and all are nearly completed. Five additional schools have been opened, and extensive repairs, amounting to between $2,500 and $3,000, have been made.

The schools which I have visited since September 1st, 1884, show an excellent attendance, and we may very reasonably anticipate an increased attendance for the year.

Our High School maintains its reputation for good work, and is now taxed to its utmost capacity, and nearly all our graded schools are measuring fully up to the standard of work and usefulness which we have constantly aimed to establish for them.

Respectfully submitted,

P. A. WITMER,
Secretary.

WASHINGTON COUNTY—SUMMARY OF SCHOOL STATISTICS.

For year ending September 30, 1884.

	1884.	1883.
Number of school-houses	131	128
(Frame, 38; brick, 66; log, 16; stone, 11.)		
Number of male teachers—principals—(white, 101; colored, 7; total, 108)	108	107
Number of female teachers—principals—(white, 15; colored, 5; total, 20)	20	20
Number of male teachers—assistants—(white, 18; colored, 0; total, 18)	18	18
Number of female teachers—assistants—(white, 36; colored, 1; total, 37)	37	33
Total, (white, 170; colored, 13; total, 183)	183	178
Number of fenced lots	25	24
Number of schools having out-buildings	129	128

		$3,127 18

WICOMICO COUNTY.

Professor M. A. Newell.

DEAR SIR: I send you herewith the Annual Report of the Public Schools of Wicomico county. I know of nothing that calls for special attention. Our schools are in about the same condition that they were twelve months ago. I am not prepared to say that there has been any decided change in the work. The Board is making an effort, and with some degree of success, to get better houses and more comforts generally, for the pupils. Our county has kindly responded to our calls for aid for this purpose by levying an additional $1,000 for building school-houses. This will meet our demands. We think a sentiment in favor of greater facilities for education is growing with our people. As usual, our schools were open 7½ months. We are not making an effort to run them longer than this, believing that there are, pro rata, better results than there would be for a longer time.

It will be seen by examining the "summary" page that we do not report as many school-houses this year as last. It has been a custom heretofore to report houses long used for school purposes, but rented. We now report those actually owned by the Board.

THOS. PERRY,
Secretary.

WICOMICO COUNTY—SUMMARY OF SCHOOL STATISTICS.

For year ending September 30, 1884.

	1884.	1883.
Number of school-houses—(all frame)	66	70
Number of male teachers—principals—(white, 28; colored, 11; total, 39)	39	..

APPENDIX.

Grades in Primary and High Schools.

The following are the studies prescribed for the several grades in Primary and High Schools:

First Grade—First Year—

1. Reading and spelling from chart or blackboard; reading and spelling Primer, or one-half of First Reader.
2. Writing and printing capitals and small letters from copies on blackboard.
3. Counting objects as far as 20.
4. Writing figures as far as 20.
5. Adding, subtracting, multiplying and dividing by 2, orally, as far as 20.
6. *Drawing.*
7. *Object lessons.*
8. *Singing.*

Second—

1. Reading and spelling to the end of First Reader.
2. Writing words and sentences from blackboard and from First Reader.
3. Counting as far as 100.
4. Writing and reading figures as far as 1000.
5. Adding, subtracting, multiplying and dividing by 3, 4 and 5 as far as 100.
6. *Drawing.*
7. *Object lessons.*
8. *Singing.*

Third—

1. Reading and spelling to the end of Second Reader.
2. Copying on slates the lessons of the Reader.
3. Spelling one-half of Primary Spelling Book.
4. Writing and reading figures as far as millions.
5. Adding, subtracting, multiplying and dividing by 6, 7, 8 and 9.
6. Writing in Copy-book No. 1.
7. Oral lessons in Geography, including the maps of Maryland and the United States.
8. *Drawing.*
9. *Object lessons.*
10. *Singing.*

Fourth—

1. Reading and spelling to the end of Third Reader.
2. Primary Spelling Book completed.
3. Copying of lessons in Third Reader; reading from slates the lessons copied.
4. Elementary Arithmetic, through Long Division and United States Money.
5. Writing—Copy-book No. 2.
6. Geography—oral lessons—maps of North and South America.
7. Grammar—oral lessons—distinguishing the parts of speech and the different kinds of simple sentences.
8. *Drawing.*
9. *Object lessons.*
10. *Singing.*

Fifth—

1. Reading and spelling to the end of the Fourth Reader.
2. Writing lessons in Fourth Reader from dictation.
3. Spelling—Advanced Spelling Book—one-half.
4. Elementary Arithmetic completed.
5. Writing—Copy-books Nos. 3 and 4.
6. Grammar—oral lessons—parsing and analysis of easy sentences.
7. Geography—one-half of Intermediate Geography.
8. *Drawing.*
9. *Singing.*
10. *Needle-work* (for girls) and *Domestic Economy.*

Sixth—

1. Reading and spelling to end of Fifth Reader, alternate with History of the United States.
2. Spelling—Advanced Spelling Book completed.
3. Practical Arithmetic completed.
4. Writing—Copy-books Nos. 5 and 6.
5. Grammar—Elementary Grammar completed.
6. Geography—"Intermediate" completed.
7. Easy lessons in composition.

☞ Subjects in *italics* are recommended, but are not obligatory.

TIME TABLE.

Each grade may have four daily recitations, as follows:

		Minutes.
1st.	One lesson of 15 minutes and three of 10 minutes each	45
2d.	One lesson of 15 minutes and three of 10 minutes each	45
3d.	One lesson of 15 minutes and three of 10 minutes each	45
4th.	Two lessons of 15 minutes each and two of 10 minutes each	50
5th.	Two lessons of 15 minutes each and two of 10 minutes each	50
6th.	One lesson of 20 minutes and three of 15 minutes each	65

Seventh—

1. Arithmetic reviewed.
2. Algebra (Wentworth's or Robinson's)—through Equations of the First Degree.
3. Geometry—two books of Wentworth or an equivalent; Geometrical Drawing.
4. Physical Geography.
5. English Grammar—Morris's "Elementary Lessons;" parsing and analysis of "Paradise Lost," Book I.
6. Practical Exercises in Composition.
7. English History—Green's "Short History."
8. Latin Grammar and Reader.
9. Book-keeping.

Eighth—

1. Algebra—through Equations of the Second Degree and Progressions.
2. Geometry, Plane and Solid, completed.
3. Natural Philosophy.
4. Rhetoric.
5. Modern History.
6. Latin—Cæsar "De Bello Gallico," three books.

Ninth—

1. Plane Trigonometry and Surveying.
2. Chemistry.
3. Botany.
4. Physiology.
5. History of Rome.
6. English Literature (Shaw's).
7. English Language (Lounsbury).
8. Elocution.
9. Latin—Virgil's Æneid, four books; Sallust—"The Conspiracy of Catiline."

Baltimore Manual Training School.

"See first that the design is wise and just;
That ascertained, pursue it resolutely.
Do not for one repulse forego the purpose
That you resolved to effect."

To the Superintendent of Public Instruction.

SIR: In accordance with your request to prepare a summary of the history and work of the Baltimore Manual Training School, I have the honor to transmit to you the following:

HISTORICAL SKETCH.

April 23, 1883, Messrs. Joshua Plaskitt, James W. Bowers and John F. Hancock were appointed a committee on industrial education. To the committee were added the President of the Board of School Commissioners and the Superintendent and the Assistant Superintendent of Public Instruction.

September 28, 1883, the undersigned prepared for the Baltimore Sun a rèsumè of the information submitted to the Committee, giving the gist of the opinions and arguments developed and the suggestions and recommendations offered in relation to the establishment of the proposed manual training school.

October 20, 1883, the City Council, at the instance of John B. Wentz, Esq., directed the Board of Commissioners of Public Schools to establish a school for manual training.

December 20, 1883, the writer was commissioned by the President of the Board of Commissioners of Public Schools to visit St. Louis and Chicago and inspect the manual training schools in those cities. He submitted a report on his return, which was published in the Baltimore Sun, January, 1884.

January 14, 1884, a prospectus of the school was published. Recognizing the success of the school in St. Louis, under Dr. Woodward, the circular provided for the establishment of a school on the same plan.

January 31, 1884, on motion of Mr. Joshua Plaskitt, the General Assembly of Maryland repealed the Act passed in 1868, entitled "Public Education," and enacted a section in lieu thereof that "the Mayor and City Council of Baltimore shall have full power and authority to establish in said city a system of free public schools which shall include a school or schools for manual or industrial training."

February 4, 1884, Prof. Calvin M. Woodward, Dean of the Polytechnic School and Director of the Manual Training School of Washington University, St. Louis, delivered an address, at Johns Hopkins University, on "The Fruits of Manual Training." President D. C. Gilman had given the use of Hopkins Hall to the Committee on Manual Training School, who had issued some five hundred invitations. John T. Morris, Esq., President of the School Board, presided.

THE WORK OF THE SCHOOL.

March 3, 1884, the school passed "out of the stage of prospectus into the stage of existence." Our Baltimore Manual Training School is the first instance where a school *entirely* devoted to manual training has been organized on the same plan and grade as part of any public school system. It represents the last and boldest step that has been taken to relieve public education from the accusation that it is "unpractical," and its inception marks an era in the educational history of Baltimore.

That there was a real demand for a manual training school in Baltimore is abundantly shown by the fact that hundreds of boys have sought admission. Although it was intended "not to have a class of more than forty or fifty pupils at first," so numerous were the applications for admission that the month of March closed with 62 students on roll, April with 80, June with 100, and September with 150.

It will be remembered that boys fourteen years of age, members of the City College or pupils in the first grade of a grammar or of a "public" school, were to be admitted without examination. One hundred and twenty-five out of the hundred and fifty students in attendance when the school closed in December had brought certificates signed by the principal of the Baltimore City College or the principal of a male grammar school, or the principal of a "public" school.

The course of study proposed for the first year—being subject to whatever changes experience might dictate—was enlarged by the addition of geometry and physics to the theoretical studies (arithmetic, algebra, English history, physical geography, physiology and drawing) to provide for the students who came from the first, second and third-year classes of the City College. To the shop-work (carpentry and joinery) were added vise-work, forging, wood-turning and soldering, instruction in which continued to July 3rd only. In the absence of any rules or regulations, the administration of the school was exercised through orders and instructions received from the committee or its chairman.

On the afternoon of June 12th there was the first exhibition of drawings made and shop-work done during the previous three months. The "Training School Press" printed the invitations and programmes. State and city officials, parents and invited guests filled the hall. The programme consisted of two parts, as follows: Part I. participated in by the students only, and Part II. by the President of the School Board, by the gentleman who framed the ordinance establishing the school, and by those whose sons were then enrolled as students of the school and had tested its usefulness.

ORDER OF EXERCISES.

PART I.

Russian Hymn.....By the School.
Report of Visit to Pump House, Druid Hill Park..Master Griffith.
Chorus—"Maryland's Ode to the Sable and Gold".By the School.
Report of Visit to Iceboat Latrobe.....Master Kines.
Chorus—"The Saws so Sharp and Bright".....By the School.
Report of Visit to Mount Clare.....Master Reese.
Chorus—"The Blacksmith".....By the School.
Report of Visit to Loch Raven.....Master Thomas.
Chorus—"One More River to Cross".....By the School.
Report of Visit to Washington.....Master Kefauver.
Chorus—"America".....By the School.
Report of Visit to Printing Press Factory....Master Warrington.
Report of Visit to Type Foundry.....Master Carter.
Piano Duet.....Masters Hughes and Bump.
The Intellectual Department.....Master Molinard.
Chorus—"Farewell".....By the School.

PART II.

History of the School.....John T. Morris, Esq.
Object of the School.....John B. Wentz, Esq.
Success of the School.....J. M. Carter, Esq.; G. S. Griffith, Jr., Esq.; D. F. Haynes, Esq.

PRESENTATION OF PRIZES.

COMPETITIVE DRILL AND MARCHING.

In September the school numbered 150 students, whose average age is 15 years 6 months. They were formed into three classes, each containing fifty. The school session (9 A. M. to 2½ P. M.) was divided into three equal periods of 1½ hours each—not counting from 12 M. to 1 P. M. A class, when it went into the shops for instruction, was separated into two equal sections—25 students going to the wood-working department and 25 to the metal department—each section being under the care of a special teacher. The theoretical studies (arithmetic, algebra, geometry, English history, physics, physiology, geography and drawing) were taught to classes of fifty.

September 1, the mechanic art courses in carpentry, joinery and vise-work in use in the School of Mechanic Arts, Boston, were adopted. Their spirit and method have been faithfully adhered to, so that instruction in the shops has not been left to accident or caprice. Mr. Dugent, instructor in the metal department, thus writes: "The method of teaching is to name and describe the various tools, and give practical instruction in the use of them. The system upon which we work is arranged so that the students at the vises have each a piece of metal to work into a certain form. Each form is a lesson, and when one is completed another is given. I am perfectly satisfied with the present system. The advantage of the above system is that it enables the instructor to compare the progress of the different pupils so as to form an average." Mr. Onion, instructor in the wood-working department, briefly reports as follows: "Five per cent. of material is spoiled"—"lessons are given in the use of wood-working tools"—"school work is comparatively better than outside work"—"method of teaching is (1) by class instruction, (2) by individual instruction"—"I am satisfied with the present system of instruction."

All the students will pass successively in the first year (from September 1, 1881, to July 3, 1885) through the wood-working and metal shops. The 75 students who have been under instruction in carpentry and joinery will, on February 10, 1885, after having spent half of the scholastic year in the

wood-working department, take the places of the 75 who up to that time will have been pursuing the course in vise-work.

The lessons completed in the wood-working department are as follows:

1. Mitered Frame.
2. Single open Mortise and Tenon.
3. Double open Mortise and Tenon.
4. Through Mortise and Tenon.
5. Line Mortise and Tenon.
6. Single open Mortise and Tenon with Mitre Joint.
7. Double open Mortise and Tenon with Square and Mitre Joint.
8. Through Mortise and Tenon for Rabbeted Frame.
9. Through Mortise and Tenon for Double Rabbeted Frame.
10. Brace Joint with Mortise and Tenon.
11. Blind Mortise and Tenon with Post.
12. Dowel Joint.

The lessons completed in the Metal Department are as follows (vise-work only, chipping and filing):

1. Rectangular Block.
2. Rectangular Block with Champered Edges.
3. Octagon.
4. Slot Joint (half finished).

Small classes have also used the printing press, the papyrograph and the type-writer.

Past Assistant Engineer Ford thus reports his work:

"Weekly recitations in Geometry, Trigonometry and Mensuration have been heard, and lectures given in Physics, and daily practice in drawing in periods varying from 45 to 90 minutes each, to all students.

"The students in A class have completed the first book of Geometry, those in B class are well advanced in the first book, and those in C class are just commencing the theorems. In Trigonometry the students of A class are studying the functions of the arc, and those of B and C classes are finishing logarithms.

"In Mensuration the students of A, B and C classes are

studying the theory of Mensuration from the notes of Haswell and Tautwine.

"In Physics the students of A, B and C classes have advanced as far as the Composition and Resolution of Forces, from notes of Avery and Ganot. Experiments with the instruments belonging to the school have been made when practicable. Without a laboratory and additional instruments, these experiments are necessarily not so complete as is desirable. Nearly all the necessary instruments could be made by the advanced students in the school, and as they are of high cost it is recommended that they be so made.

"The students have all been instructed in the use of the scale and ordinary drawing instruments, except in the use of the pen. The drawing has been of geometrical forms, joints, beams and trusses, besides working drawings for the shops. These have been sketched on a black-board, explained, the names and fitting of the different parts noted, the sizes given, and all necessary calculations made, and a scale to which to work noted, when the work is executed to a scale on paper. It is proposed to continue this system to include form and strength of materials and architectural and mechanical constructions. In other words, the method is that of the best draughting rooms.

"A sub-class of the more advanced students of A class has made drawings of the different floors of the building occupied by this school, showing the present arrangement of tools and machinery and the arrangement of the class rooms."

The Director has given instruction in English language and literature, history, physiology, industrial geography and map-drawing, higher arithmetic and algebra. The habit of diagramming, picturing and tabulating has been taught, and practically ours has been a "school without text-books." It is not proposed to follow so closely such a method of instruction, but it is believed that the teacher who makes a free use of such teaching is the one from whom the scholars get their most helpful items of knowledge, and to whom they give in the end their warmest affection. The late assistant superintendent, whose son is a student in the school, thus wrote of he method of instruction:

"On returning up-stairs we passed through a room where the printing press was at work, and several boys were employed in setting the type for some printing matter to be used in the school. In the next room the rest of the boys were engaged in the study of History. The novel and interesting way in which this study is taught awakened the longing to have studied the annals of our country's glories in a like manner. Not merely the dry facts of some by-gone event were here given. Geography and History, 'now and forever, one and inseparable,' were not rudely torn asunder to be studied in a broken, fragmentary way. The mutual dependence they have upon one another was recognized, and by their union one of the most interesting studies formed that ever delighted boyish hearts. The topic for the day happened to be the late civil war. On one of the black-boards was a map of the theatre of war. The solid North, the solid South, and Maryland, Missouri and Kentucky, which, though sympathizing with the South, joined the North, were each designated by a different color. West Virginia, as separating from the mother state, was also specially marked. The boys copied this map, and while doing so studied the products of the states, the contour of their surfaces, their climate and soil. Next came the state of society existing in each, with the prevailing political parties, the relation each section bore to the National Government and to foreign countries, until finally the causes of the war stood forth in bold relief, and each one saw and understood how inevitable was the conflict, and that, no matter how long postponed, there was only one way of settling the differences in opinion caused by centuries of different education and experience. Here biography, the history of individual lives, stepped in and joined her charms to those of her sister studies. The boys, with ready sympathy, followed the lives of prominent commanders on either side, and identified their heroes, as far as possible, with the places in which some noble daring action of theirs gleamed forth in proof of their greatness. Finally came the end of the long struggle and its result, with the entire change in life and customs occasioned thereby. Thus the Revolutionary war, the war with England in 1812, the Mexican conflict, and

the Franco-German war of 1870, have been studied, and surely the boys will remember more definitely the many victories due to American valor by being brought face to face with them in this way than by poring for months over musty volumes of dry facts, and the situation of towns and rivers is certainly more indelibly engraven on their memory by associating it with the actions through which it grew famous.

"Physiology, too, that study all-important to man, is taught by means of drawings, which the boys are required to make, sometimes enlarging a small wood cut into a chart two or three feet long. The structure of bones, the position of the muscles, the distribution of the nerves and the circulation of the blood, all the various movements and functions of the organs of the body, are thus explained to them. They are taught in this practical way how wonderful is this outer garment of our soul, while at the same time they gain great proficiency in the use of that 'universal language of the world,' in which the Indian of the Western prairies may converse with the highly cultured sage of England or France, though neither understands what the other speaks; by which the man of science may explain to the simplest and humblest peasant the most complicated and abstruse problems; but without which he will continually be troubled to make himself understood, though he use the finest figures of language and the clearest logic.

"Surely all who have accompanied us will agree that the motto of the school, 'The cunning hand and cultured brain,' as there developed, is the thing to be sought after by all who expect to keep up in the race of humanity on the road of life, and that unless these two are taken equal account of by all educators, evil results are bound to follow and make themselves felt in the progress of the community."

Discipline. The greatest care has been taken to foster a spirit of manliness and truthfulness and a high sense of duty among the students, and the discipline has been administered by an appeal to these feelings. In every instance where school property has been injured or destroyed by the students they have replaced the same. It has also been considered of the first importance to act in harmony with the parents.

The faculty has ruled upon doubtful points of discipline as they arose, and this scrupulous procedure, while giving precedents for the future, has insured precision and consistency.

Visitors. His Excellency, the Governor of Maryland; his honor, the Mayor of Baltimore; officers of educational institutions throughout the country; army and navy officers; state and city officials; and others have visited the school.

Excursions. In aid of the practical studies of the school, and as a means of familiarizing the students with the actual details of work as is done in the School of Industrial Science, Boston, and similar schools; the students, with their teachers, made Saturday visits of inspection to—the Pump House in Druid Hill Park; the Ice-Boat "Latrobe;" the shops of the B. & O. R. R. at Mount Clare; Loch Raven, Maryland Central R. R.; Navy Yard, Washington; J. F. W. Dorman's Printing Press Factory; John Ryan & Co.'s Type Foundry; E. L. Tunis & Co.'s Planing Mill; Smith & Wick's Can Factory; Isaac A. Shepherd & Co.'s Iron Foundry; Otto Duker & Co.'s Lumber Manufactory; Naval Academy, Annapolis; Union Bridge and Penmar, Western Md. R. R.; Poole & Hunt's Iron Foundry; Wm. E. Hooper & Co.'s Cotton Factory; Brush Electric Light Works; Wm. E. Woodall & Co.'s Ship Yard. Reports of the visits were handed in, which included descriptions and diagrams of the objects seen.

CONCLUSION.

In the foregoing, the effort has been to give clear and simple statements which tell their own story. The success of the enterprise has been beyond expectation, and it cannot be denied that the school has been a praiseworthy experiment.

Mr. Wm. Dugent and Mr. Jas. H. W. Onion, instructors, have been associated with me from the day the school opened, and Past Assistant Engineer John D. Ford, U. S. Navy, entered on duty March 17th. These gentlemen have exerted all their ability, all their energy, all their skill, all their resources of whatever kind, in broad, hearty efforts to make the school a success.

RICHARD GRADY,
Director.
